

# Florida D.O.T. Destin, Florida

Rehabilitation of  
30" x 72' Corrugated Culvert Pipe  
with the  
Poly-Triplex Liner System.

Poly-Triplex Liner System is saturated with epoxy resins and prepared to be inserted into the deteriorated culvert.

Liner is winched through the culvert then cured in place with air pressure and steam heat injection.

**Deteriorated Culvert is Structurally Rehabilitated  
in one day with the Patented CIPP  
Poly-Triplex® Liner System.**
